

# This Happens Nearly 700,000 Times Every Year.

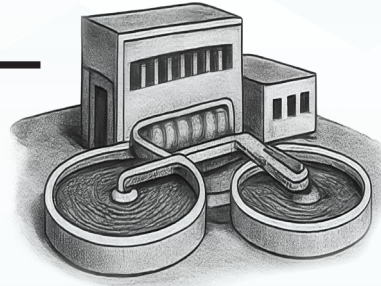

Mother takes abortion pills.

Mother delivers human remains and flushes them down the toilet.

Abortion drug contaminants polluting our drinking water?

Water treatment plants are not designed to remove abortion waste.

The EPA discourages flushing anything other than toilet paper, and numerous state laws specifically prohibit flushing medical waste. Yet for decades, the FDA and EPA have allowed abortion providers to instruct women to flush tons of human remains into our water systems.
